

Additional  
Surcharge

## For best printing results on a covered zip, here are our recommendations:

### IDEAL

Outline of the logo with only a worn effect. 2 colors maximum.

### IDEAL

Logo with a transparency and worn effect on the zipper. 2 colors maximum.

### ACCEPTABLE

Logo with transparency. 2 colors maximum.

### NOT TO DO

An opaque logo will cause cracks and irregular ink deposits.

It is very difficult to print consistently on the fabric covering and surrounding a zip. In every order, there will be minor printing variations from one garment to another.

SAME LOGO,  
SAME ORDER,  
RESULTS  
MAY VARY

A pre-production sample is strongly recommended for screen printing on a covered zipper.
