

For best printing results on a covered zip,  
here are our recommendations:

**\$\$**  
Additional  
Surcharge

## IDEAL

Outline of the  
logo with only  
a worn effect.  
2 colours maximum.

## IDEAL

Logo with a  
transparency  
and worn effect  
on the zipper.  
2 colours maximum.

Some details of the logo can be very subtle on the zipper.

## ACCEPTABLE

Logo with  
transparency.  
2 colours maximum.

## NOT TO DO

An opaque logo  
will cause cracks  
and irregular  
ink deposits.

It is very difficult to print consistently on an uneven surface. In the same order, slight variations in printing and positioning from one garment to another may be expected. A screen printing on an irregular surface is necessarily considered as a non-standard location. We cannot guarantee exact PMS.

SAME LOGO,  
SAME ORDER,  
RESULTS  
MAY VARY

A pre-production sample is strongly recommended  
for screen printing on a covered zipper.
