

PRE-PRODUCTION SAMPLE

Due to the colour calibration which differs from one computer screen to another, the colour appearance of a virtual mock-up may vary from the final product. Thus, a pre-production sample can be provided to confirm the exact colours (applicable fee).

COLOUR OF THE GARMENT

Slight variations in the colour of the logo may occur depending on the colour of the garment, the transparency and the thickness of the ink deposit. For example, the same red ink will vary if applied on a white garment versus a black garment.

PANTONE COLOUR REFERENCES

We keep in stock ink colours (PMS). See the following page for the complete list. If we have to develop a new PMS, a fee per colour applies. If your logo requires specific colours, you must use a Pantone® chart as the reference tool, and not rely on the colour rendering from your screen mock-up. If you do not specify a Pantone® colour, we will match the colours with those from our own screens and therefore, cannot guarantee an exact match.
