Multimedia decorations are made in **2 steps**. It is therefore difficult to perfectly align the elements of a concept for which, two decoration techniques are used.

STEP 1 / SCREEN PRINTS
The garments are screen printed

STEP 2 / APPLIQUÉS and/or EMBROIDERIES
The appliqués and embroideries are added to the garment

Recommendations to optimize a multimedia decoration

Original logo

Screenprint
Appliqué

Avoid perfect alignments and inserting appliqué and/or embroidery elements between 2 screen printed elements (Very difficult to create)

It is recommended to overlap elements and to apply a vintage print effect.

A variation of 0.75 inch horizontally and vertically between the two techniques used for a multimedia design is possible.
